

GUY DUBOIS
MEDEA+ OFFICE DIRECTOR

Guy Dubois has started his professional career in 1968 as engineer for semiconductor process and device R&D at Thomson. In 1978 he joined the manufacturing organisation of Thomson Semiconductors and became after the merge of Thomson Semiconductors and SGS Microelettronica in 1987 a Group Quality Manager of the newly formed STMicroelectronics. In 1990 he was promoted Plant Manager in Rennes and returned back to Grenoble as Operations Manager in 1994, subsequently taking care of several management functions in the company's international engagement. As Group Vice President, Guy Dubois has been responsible since 2005 for Strategic Projects, Front End Technology and Manufacturing in STMicroelectronics.
