EUREKA treasures

 online exhibit

Technology touches almost every aspect of our daily lives. That's why it's important that the latest advances reach the marketplace as quickly as possible, so that we can all reap the benefits. The 12 projects featured on this online exhibit, which accompanies the EUREKA Treasures Exhibition, range from home entertainment to road safety. They are already making a real difference to people's lives, as well as giving Europe's industries a competitive advantage in the global marketplace. EUREKA's contribution has been to help make them happen.

- **MEDEA+ Design Automation Conference**
Chiemsee (Yachthotel) - GERMANY
 May 30, 2006 to Jun 01, 2006
 Electronic Design Automation (EDA) is a critical tool in reducing the length of the design cycle and thus speeding the marketing of new products. The MEDEA+ 2006 EDA conference is supplying a balanced mixture of proven technical contributions by exchanging experience/results from the EUREKA Cluster MEDEA+ projects and by supplementing some freshening new elements combining: - High Level presentations on needs/challenges from technology, system, and EDA suppliers point of view. - Presentations of particular EDA requirements in developing/integrating Silicon based Systems with focus on technology, system integration, and software. - A variety of success stories giving evidence of the impact of completed EUREKA Cluster MEDEA+ projects.

- **2nd European Research & Innovation Exhibition**

Paris (Porte de Versailles) - FRANCE

Jun 08, 2006 to Jun 11, 2006

This is a key event to promote the scientific professions, discuss research policy, bring together the European Commission and European member countries, and talk about science in broad terms. This exhibition presents discoveries and innovations; highlights involvement in the fields of research, innovation and the environment; communicates about strategy in research, innovation and the environment; finds partners; encourages contact between publicly funded and private research and meets all the players involved throughout the economic chain of research.

Other events

- **ECMS 2006 - 20th European Conference on Modelling and Simulation (SCS-ESM)**
Sankt Augustin - GERMANY
 May 28, 2006 to May 31, 2006

The purpose of the conference is to serve as a forum for the exchange of ideas and experiences among researchers, practitioners, students and teachers from all modelling and simulation related disciplines. ECMC 2006 features an outstanding technical programme including keynote speeches, special tracks on selected state-of-the-art modelling and simulation topics, a student session, a Best-Paper Award, a Best-Student Paper Award, an accompanying exhibition and a social programme.

- **ISD 2006 - Industry Space Day 2006**
Noordwijk (ESTEC - European Space Research & Technology Centre) - THE NETHERLANDS

May 29, 2006 to May 31, 2006

The aim of this major forum for all space actors is to improve the involvement of SMEs in space activities and to foster cross-fertilisation between the different actors in the whole space sector. It will highlight SMEs' expertise and the role they can play. It will also help all space actors identifying tomorrow's business opportunities and industrial strategies of the sector. ISD 2006 will be the first landmark of the ESA/EC "Sinequanet Project".

■ **Euroscience Open Forum 2006 (ESOF2006)****Munich - GERMANY**

Jul 15, 2006 to Jul 19, 2006

ESOF is a pan-European scientific meeting staged to provide an interdisciplinary forum for open dialogue, debate and discussion as well as showcase European achievements right across the scientific spectrum. Through ESOF, researchers and scientists, as well as journalists and the general public are provided with a platform for exchanging views and discussing the challenges and consequences of scientific developments around the world.

ocean and land in the maritime supply chain. Its unique conference format covers both strategic business development and practical operational issues, ensuring a larger audience of industry professionals, improving networking, learning and business opportunities. The exhibition brings together executives from the port, terminal and shipping industries, government, and suppliers of handling equipment, systems, software and services for modern port and terminal operations. It provides delegates and visitors with the opportunity to review the latest technology and benchmark their procurement strategies.
