

Ecosystems driving open innovation in the European Embedded and Software Intensive Systems and Services industry

On 30 October 2009, ITEA 2 & ARTEMISIA Association will co-organise the ARTEMIS & ITEA Co-summit. The Co-summit is organised as part of the *ITEA 2 Symposium* (29-30 October) and the *ARTEMIS Autumn Event* (29-30 October), which will take place in the Auditorium Hotel in Madrid, Spain.

The programme is scheduled around this year's theme: '*Ecosystems driving open innovation in the European Embedded and Software Intensive Systems and Services industry*'. Presentations include industrial and political viewpoints on the theme. Furthermore in the afternoon there will be parallel sessions for participants to join on different topics linking the themes to concrete ICT-based approaches and examples.

An exhibition with over 60 projects showcasing their results and achievements with demos will again be a focal point of the event.

Registration

29 October is on invitation only, but the Co-summit (30 Oct.) has an open registration. For more information and registration, please go to our event websites:
