JEES Presentation - English version

JEES SUMMIT – Salons Hoche Paris 8^e - December 10th & 11th, 2009

For the second year, the SITELESC and the GIXEL organize the JEES (Join European Electronics Summit) on December 10th and 11th 2009, in Paris 8^e – Salons Hoche.

The main topic is « Electronics for a sustainable world », where we want to emphasize the contribution of the electronics to the major societal challenges in 3 domains: security - health - sustainable development.

We will contribute to relieve the messages of Pierre GATTAZ beside the Government with some concrete examples which are realized by some innovative SMEs...

Surround by high speakers specialized in electronic, such as Albert FERT, the Physics Nobel Prize 2007, who will speak about the impact of spintronics on the Information and Communication Technologies (ICTs).

We expect around 200 peoples, like CEOs, SMEs innovates, research institutes, European public authorities, financial institutions, journalists, R&D...

We are waiting to see you and count on you to relieve the information.
